

College Rentals

College Rentals is a marketing platform for college-style apartment complexes to share their listings and reach students. We represent properties in all 50 states. In addition to that, College Rentals runs a popular apartment blog that specializes in posting articles to interest college students, their parents, and property managers. College Rentals works to be a one-stop shop for college students when it comes to apartment shopping and college life.

Content Writer Internship

The Content Writing Internship will enable the students to gain hands-on experience with our Social Media and Content Manager as well as our Graphic Design team. It will consist of two weekly assigned articles. The pieces will then be edited by our Content Manager who will work one on one with the student.

The goal is to help students gain experience in deadline and content writing while still allowing for creativity.

We offer our internship opportunities to students across the nation to allow for equal opportunity regardless of location. We value each student based upon what they bring not based on where they are from.

An ideal College Rentals candidate would have a solid understanding of creative writing, be able to utilize the internet for the purpose of research and be excited about pursuing a career in the field of content writing. College Rentals wants to make sure each of our student interns receives as much as they give.
